

Corporate governance

NCAB views sound corporate governance as an important foundation on which to build a trusting relationship with shareholders and other important parties. The Swedish Corporate Governance Code, which is applied by NCAB, aims to create a good balance between shareholders, the Board of Directors and senior management. Reasonable corporate governance, with a high standard in respect of transparency, reliability and ethical values, is a guiding principle for NCAB.

NCAB's shares are traded on Nasdaq Stockholm and therefore apply, in addition to the rules of the Swedish Companies Act (2005:551) and the Swedish Annual Accounts Act (1995:1554), the Nasdaq Stockholm's Rule Book for Issuers and the Swedish Corporate Governance Code (the "Code") as well as other Swedish and foreign laws and regulations, where relevant. The Code defines a norm for corporate governance on a higher level of ambition than the Swedish Companies Act and other regulations' minimum requirements. The Code is based on the principle of "comply or explain." It means that the company must not, at every occasion comply with every rule of the Code, but may choose other solutions that are deemed to better respond to the circumstances in the individual case. Provided that the company openly reports every such non-compliance, describes the alternative solution chosen and states the reasons for this.

COMPLIANCE WITH THE SWEDISH CORPORATE GOVERNANCE CODE

No violations of applicable rules and regulations

RISK MANAGEMENT

The Group's finance department works with the Group's operating units to identify and evaluate financial and operational risks. In business operations, the main risks relate to quality issues. These are continuously monitored within the scope of the operational controls, and through internal and external ISO audits. Risk management is handled by the Group's quality department and in accordance with policies approved by the Board of Directors. A risk evaluation in accordance with the COSO model is conducted on an annual basis where risks are identified and controls evaluated. Both operational and financial risks are tested internally through self-monitoring and these are followed up by the Audit Committee. Some of the self-moni-

toring, which is carried out by subsidiaries, is also followed up by the company's external auditors. The Group's financial policy for financial risk management has been formulated by the Board of Directors and provides a framework of guidelines and rules in the form of a risk mandate for financial activities. The overall aim of the finance function is to ensure that the financial risks are optimised to a risk level that gives the shareholders a good return, within the framework of the risk mandate provided by the Board of Directors.

Risk management is handled by the Group's finance department and in accordance with policies approved by the Board of Directors. NCAB's risk management process also includes drawing up of the annual business plan, which contains an analysis of trends, business opportunities and risks that enables an assessment and swift reaction to changes in social, environmental and legal requirements. Each process owner is responsible for the ongoing evaluation, development and implementation of risk control methods and processes.

For more about risks and risk management, see pages 18–19.

INTERNAL CONTROL

The Board of Directors and the CEO are ultimately responsible for ensuring that internal controls are

developed, communicated to and understood by the employees of the company. Managers at all levels are responsible for ensuring that internal controls are established within their own area and that these controls have the desired effect. The procedures for internal control, risk assessment, control activities and monitoring for financial reporting have been designed to ensure reliable financial reporting in accordance with IFRS, applicable laws and regulations as well as other Stock Exchange requirements. This work involves the Board of Directors, the executive management and other personnel. The way in which the Board of Directors monitors and ensures quality in the internal control is documented in the adopted rules of procedures of the Board of Directors and the instructions for the Audit Committee. NCAB uses an internal control model based on the three lines of defence model.

- The first line of defence consists of the company's operational activities that are conducted according to procedures designed to fulfil the company's requirements on internal control. Process owners, along with other employees within NCAB, have roles which are clearly defined and also have clear responsibilities and direction in terms of policies, procedures, and strategies, which are necessary to achieve business goals. Self-assessments are carried out to determine the status and functionality of the associated risks and controls. This work is controlled within the scope of the company's ISO system.
- The second line of defence consists of the company's internal monitoring of controls. Monitoring, coordination and consolidation of reported results are compiled within a risk and control matrix. In addition, there is a coordination of activities to improve risk management and to ensure that the company complies with risk management, governance policies, laws and regulations.

➤ The third line of defence consists of NCAB's Audit Committee. Internal self-assessments, together with the company's external ISO evaluations, are used so that an overall picture is obtained in connection with evaluation and improvement of the risk management system. The self-assessments are reviewed and assessed by the accounting function, the auditors and the Audit Committee in order to ensure correct risk management and accounting. The compliance reports from the external ISO evaluations are presented for the Audit Committee, the Board of Directors and the CEO. The CEO and the executive management are responsible for the first line of defence. The responsibility for the second line of defence is shared between the CEO, the executive management, the Board of Directors and the Audit Committee. The third line of defence falls within the CEO's and the Board of Directors' responsibility. Compliance with internal procedures and processes is examined using self-assessment annually, when the company's external auditors review compliance as part of the annual audit.

INTERNAL AUDIT

The Board of Directors has resolved not to establish any separate function for the internal audit as the company believes the business systems, in terms of risk and quality, as well as financial function and monitoring by the Audit Committee, with regard to financial internal control, satisfy the requisite control and follow-up.

POLICIES

The company has established a number of policies and control documents that are approved annually by the Board of Directors. Both policies and control documents are managed in the company's ISO system to ensure uniform and simple handling. The following policies and governing documents are approved by the Board of Directors:

- Rules of Procedure for the Board of Directors
- Instructions to the CEO
- Instruction for financial reporting
- Instructions for the Audit Committee
- Accounting and Finance policy
